One of the world's best personal performance task chairs.

We spend a great deal of our lives sitting, despite our anatomy dictates otherwise. Sitting comfort and support are increasingly important due to the prevalence of musculoskeletal disorders. They are also associated with several risk biomarkers of cardio-metabolic health. A fully adjustable task chair of solutions may help with minimizing the risk of suffering these disturbances.

Me Too's high quality and safety standards have been approved internationally by GS Certification from LGA (Landesgewerbeanstalt Bayern) Institute.

Prolonged seated working presents several problems for physical health; the neck, shoulders, arms and legs. Sitting may be inevitable; so is coming up with answers to minimize fatigue. Me Too is highly adjustable; **Fluid Motion®** and **Fluid Motion Plus®** mechanisms, and other solutions are featured in the fully adjustable arms, front-tilt, optional lumbar and neck supports and in the seat slide. Fabric, leather or eco-leather seating; leather or open mesh backrest is available options.

- Supports freedom of movement and promotes dynamic sitting.
- 70 cm base diameter to assure stability against tipping over.
- Castor wheel options for soft and hard floor use.
- Features two types of locking wheel mechanisms for increased safety: “Locked when loaded’ and “locked when unloaded’.

Fluid Motion®

Me Too **Fluid Motion®** features multi-adjustable arms, optional lumbar and neck support, mesh backrest and castor wheels for different surfaces.

Fluid Motion Plus®

In addition to **Fluid Motion®** mechanism, **Fluid Motion Plus®** features 8 degrees of front-tilt and seat slide adjustment features.

Backrest Tilt

Researchers have concluded that chair design has the greatest effect on the pressure distribution on the seat pan. We design for dynamic sitting and the right posture. During the back tilt, your seat moves forward with a 2.7 to 1 ratio: This ensures balanced protection of the distance between your lower back and sitting surface.

Me Too has 25 degrees backrest tilt capacity, and it may be locked in 4 different positions.

Front Tilt

Only with Me Too **Fluid Motion Plus®**; front tilt ability up to 8 degrees releases accumulating stress on muscles, tendons and spine. Backrest support that counter balances your body forward, also works legs muscles and reduces exhaustion on knees.

Structural Flexibility

The three dimensional ergonomic form of Me Too features high technology flexible and durable material support. It helps maintain spinal alignment; starting with the lower back and up to the neck. Me Too mimic your body and movements, allowing you to work in motion.

Seat Depth

The adjustable seat slide lets you correct your sitting position to accommodate for your ultimate leg comfort. Only with Me Too **Fluid Motion Plus®**.

Lumbar Support

Me Too’s optional lumbar support may be adjusted to fit different body sizes; protects and relaxes the lower back.

Armrest Height

Easily and individually adjust each armrest’s height to minimize the risk of discomfort. Ideally, the work surface should be at level with or a rest a little lower than your elbow. Adjusting armrests to your task in this way helps reduce the recurrence of repetitive strain injuries like tennis elbow or CTS (carpal tunnel syndrome).

Armrest Width

Minimize articular disturbances caused by long hours of work. Reduce accumulating fatigue in the shoulders and the neck by customizing the armrest width to your body and your task.

Armrest Pad Width

If anytime you feel that adjusting the armrests widths were not enough, you may fine-tune each armrest’s pad width to your working comfort. Each wrist is cared for!

Armrest Pad Rotation

Pads may be adjusted in a full 360-degree fashion.
By mimicking the elbow angle, they allow for the correct body posture to be maintained.

Armrest Pad Movement

Easily slide the armrest pads forward and backwards to support your elbows in various working positions.

Neck Support Angle & Height

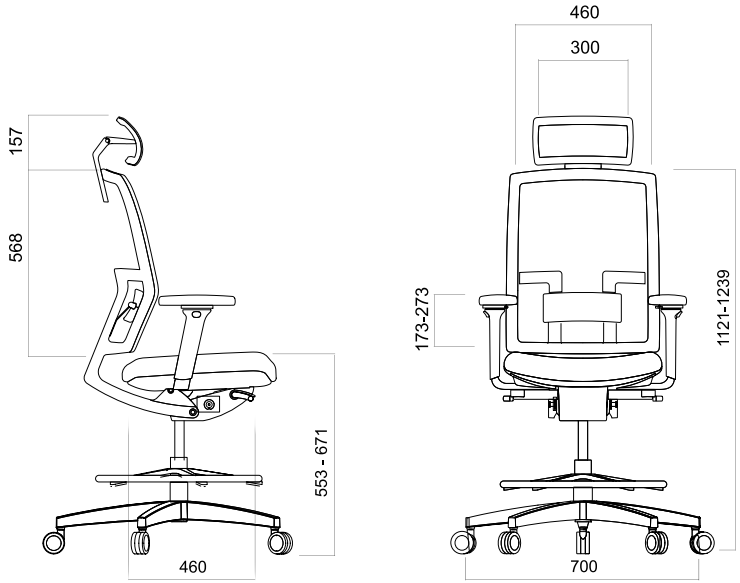

Minimize the conditions that may occur in the neck with adjustable neck support height. Customize support angle for comfort.
