

Uneo

## Uneo

Designed to support active sitting, Uneo encourages the user to move during prolonged sitting periods. Uneo is conforming to user's physique and responding to posture changes with its smart mechanism. Its Dyna-Support Plus® mechanism adjusts itself according to user's weight between 45 to 135 kilograms. Within self-weight feature, Uneo still enables personal fine adjustments to fit perfectly with flexible posture.

Integrated lumbar support and multifunctional arms comply the Dyna-Support Plus® mechanism, and create the advanced performance task chair.

4D arms allow to adjust the armrest height, width and armrest pad movement in different directions to maintain healthy sitting. Uneo also improves user comfort and supports movement with its well-balanced structure, lightweight frame and technological fabric netting.

### Designed by Martin Ballendat

Martin Ballendat was born in 1958 in Bochum. Ballendat, whose elegant and simplistic designs that are ahead of their time are recognized all around the world, has been holding an effective power in fields of interior and industrial design for over 25 years. Ballendat, who graduated from the Department of Industrial Design of Folkwangschule University in Essen, has worked at Sedus Company as designer between the years 1983-1986. In 1995, while he was the department head of design and product development in Wiesner Hager Company in Austria; he founded Design Ballendat operating in Germany, and later on in Austria as well. Ballendat, who is recognized all around the world by his eye-catching designs, has won numerous international awards for the products he has designed. He has been teaching classes in Graz and Salzburg as visiting professor for over 15 years.

Designed to fulfill the need of active working...

Dimensions defined in millimeters.
