Peak Collection

Design by **Aziz Sariyer**

As luxurious and comfortable as a throne.

Featuring lines influencing architectural structure and a design resembling a throne, Peak is an ideal choice for waiting rooms and lounge areas, as well as cafés and restaurants. Spotlighting individuality through a high backrest that decreases environmental impact, Peak establishes personal spaces in open areas.

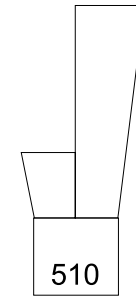

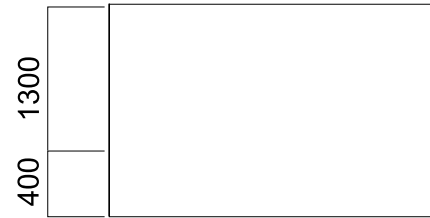

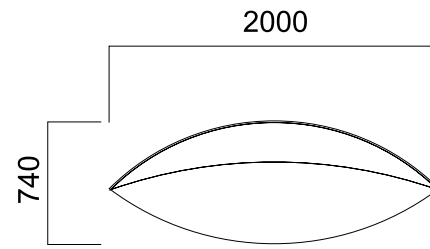

Extraordinary design and elliptic form of Peak introduces splendour and comfort to living spaces. Peak can be utilized side by side, facing one another, or in opposite directions to create a variety of seating options; high backrest spotlights individuality in social spaces, waiting rooms and lounge areas.

Featuring a rich variety of colour and fabric options, Peak seamlessly blends into usage spaces. Peak offers an alternative solution for breaks and immediate meetings in work spaces. You can utilize Peak collection with other Nurus products including coffee tables, R2, and Cork to establish lively, harmonious and significant areas.
