Isola Workstations

Design by **Nurus D Lab**

Isola Çalışma Modülleri

Rapidly changing work culture of modern business life demand work environments to be reconfigured redefined. We need spaces where we can concentrate, perform teamwork and/or individual efforts, brainstorm, and conduct minute-meetings. Isola creates alternative spaces within spaces to meet all such requirements with a rich product family.

Featuring 4 types of products (Angled, Flat, Honeycomb, and T panels), Isola work systems seamlessly blend into any interior design approach with a rich colour palette. With the exception of Single Honeycomb panels offering armchair option, all Honeycomb and T panels can be utilized with a table slab. In addition, 144 cm and 164 cm tall Flat panels offer hanger bar option.

Providing single, double, and triple choices, Isola Honeycomb panels can be used to create units for 2 or 3 people, while Isola T panels can be used to create units for 2 or 4 people.

Isola work systems are ideal for open offices. You can create defined spaces and efficient offices in work environments where more than one employee works during a work day, while you can also establish creative or lounge spaces for short breaks. Coming in a variety of height options, Isola work systems enable minute meetings and peaceful coffee breaks without having to get behind closed doors.

Isola work systems' heights were carefully calculated to minimize environmental impact while working, conducting interviews, or just thinking. Sound isolation supports concentration, while electrification solutions promote a more efficient way of working.

Design by Nurus D Lab

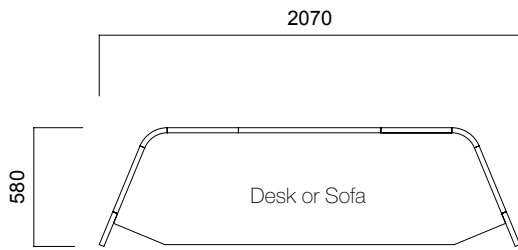

Always up-to-date with science and technology, Nurus D-Lab designs products that are ahead of their time. Through human-centered observation, prototyping and in respect to trending needs and dreams, the team works diligently. Coming up with meaningful and reflective design solutions only marks the start of the process: From strategy to launch and support, D-Lab manages it all. Each detail is attended and tested through at the advanced level.

Work environment of the future.
