
GATE

designed by Nurus D Lab

technical document

nurus

Gate consists of a main platform serving as a bridge and the storage units that complete system on this platform. Gate offers practical, innovative and flexible solutions for the ever-increasing needs, as well as offering a flexible means of working.

design

Nurus D Lab

Nurus D Lab (Nurus Design Lab) is effective in every phase, from determining the design strategy of the brand to launching the product in the market. During the product development phase, Nurus Design Lab cooperates with other designers in harmony and cooperation. The starting point for the designs is the user's needs and functionality. The phase continues with ergonomics, sustainability and aesthetic concerns and stays up-to-date by following technological developments.

Being human
is to care for future
generations.

Gate has the (TSE) Suitability to Turkish Standards certificate. About 19% recycled material is used in Gate's manufacturing. The metal pieces used in its manufacturing are 100% recyclable and the wooden material used is reusable up to 100%. Gate is 96 % recyclable.

The fabrics used for Gate's screen upholstery have the OEKO-TEX 100 STANDARD and RECYCLABLE Certificates and the MDF material has the E1 Certificate. The fabrics are fire resistance tests that are in conformity with European norms.

accessories

Apart from acrylic and fabric screens of differing widths, different storage units may also be included to the accessory band of Gate that can sit on the platform. Thus, Gate offers a more efficient use of the work areas.

Gate's accessories and cabinets may be placed on the platform, helping store such materials like paper, files and printers in an organized manner.

*The tools are used on the Gate platform and workstations.

electrification

A power connection passes through Gate's container that carries the desktop and it is carried to the desk via the cable cap on the desk. Thus, the mess created by cables is eliminated.

Cable Tray and Cable Channel

Gate's cable management system brings comfort and order to work areas. Gate carries the telephone, data and power lines to the desks via its cable tray and cable cap.

Desktop Electric Caps

It is recommended to use Turnbox and side cover for easy access of cables to tables on single tables and front cover for double table setup.

Cable Caps

Gate's cable cap placed on the desktop facilitates access to power connections.
