Breeze Collection

Design by **Justus Kolberg**

Adaptable to different workspaces and styles.

So, what makes a good work chair? Breeze has simply everything you would expect. Encourages correct posture for a healthier working habit. For high-performance tasks, executive areas, home-offices and collaborative or personal workspaces.

Highly balanced and stable on a 70cm diameter base. Prevents falling back or forth. Its compliance to workplace health and safety standards have been approved internationally by GS Certification from LGA (Landesgewerbeanstalt Bayern) Institute.

Dyna-Support® is response: It reacts to the weight of you, eliminating the need to make any special adjustments. It is a weight-activated mechanism with synchronous motion that helps keep your body in a healthy, natural position through average working hours. Allows 18 degrees of back tilt motion. Can be locked in an upright position. Perfect for touchdown areas and shared working environments.

Pro-Support® is adaptability: It can be personalized for extra comfort, regardless of body size or type. Backrest tension may be individualized with quick and fine adjustments. Encourages a healthy sitting habit for as long as you work. Allows 23 degrees of synchronous back tilt motion; three preset angles and may also be locked in an upright position. Ideal for all work environments, as well as executive offices.

High quality rubber caster wheels for hard or soft floor use: Smooth gliding operation, increased stability and safety with two types of locking mechanisms for your convenience: Locked when loaded (seated) or locked when unloaded.

- Durable, flexible and breathable mesh backrest.
- With **Dyna-Support**® or **Pro-Support**® mechanism.
- A variety of personalization tools.
- Frame in black or light gray.
- With optional adjustable headrest, seat slide and lumbar support.

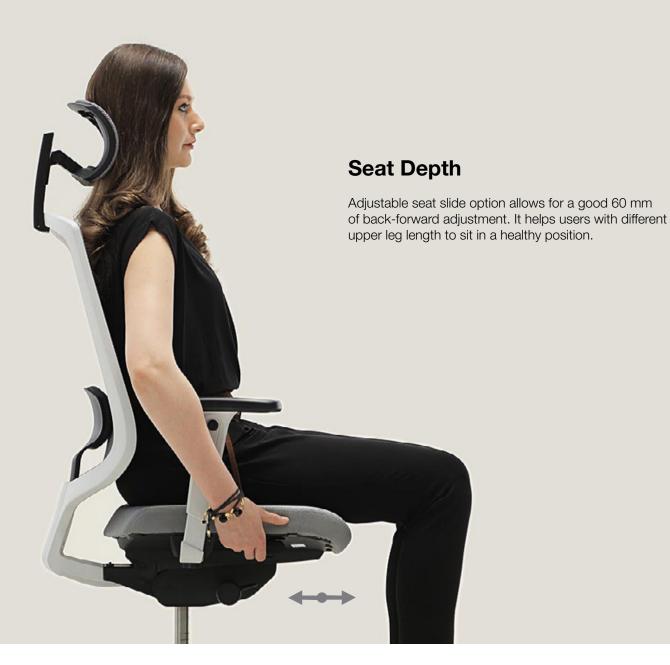

Backrest Tilt

Synchronously moving seat during the back tilt offers balanced protection of the distance between the lower back and sitting surface.

Breeze **Pro-Support**®'s backrest tilt offers 23 degrees of back tilt. Can be limited in three preset angles and locked in an upright position.

Breeze **Dyna-Support®**'s backrest tilt offers 18 degrees of back tilt. It can be locked in in an upright position.

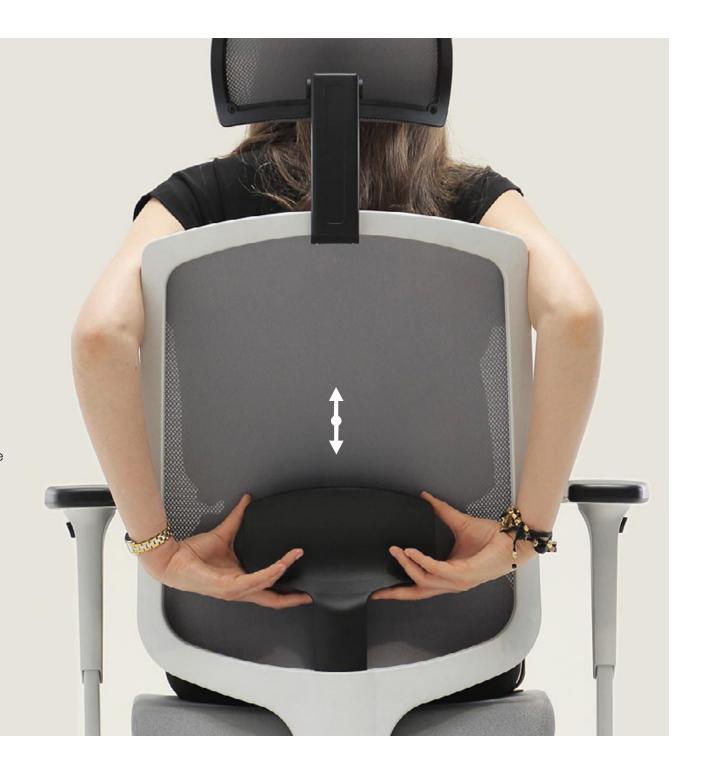

Lumbar Support

Lower back pain is second to the common cold in causing sick days. First adjust your seat depth to a natural position and then adjust lumbar support to accommodate your height and body type. Make sure your back is resting firmly against it.

Armrest Width

Minimize articular disturbances caused by long hours of work. Reduce accumulating fatigue in the shoulders and the neck by customizing the armrest width to your body and your task.

Armrest Height

Easily and individually adjust each armrest's height to minimize the risk of discomfort. Ideally, the work surface should be at level with or a rest a little lower than your elbow. Adjusting armrests to your task in this way helps reduce the recurrence of repetitive strain injuries like tennis elbow or CTS (carpal tunnel syndrome).

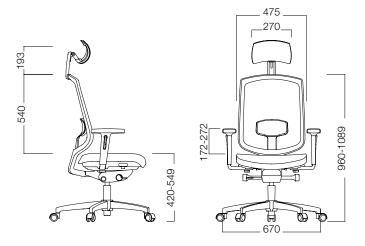

Neck Support Height & Angle

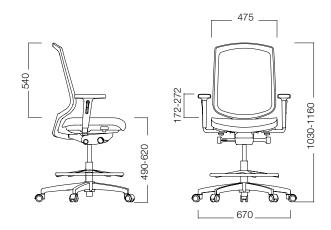

During sitting our back, spine, and neck are forced to support more weight then normal. A headrest reduces the overall stress placed on the neck. Absolutely recommended to anyone with a preexisting neck issue. Customize to for your comfort with adjustable angle and height.
