Brooklyn Collection

Design by **Nurus D Lab**

A calculated and strong build that bridges wood and metal.

Brooklyn executive system takes its name from the famous, iconic Brooklyn Bridge. True to this eponym, it is precisely and mathematically designed with the latest manufacturing techniques. Solid metal woven like a net climbs up in a hyperbole to support wooden tops and cabinets. This geometric interpretation to us, is reminiscent of the strength of a bridge.

Brooklyn family consists of executive and meeting desks, storage units and coffee tables. With wide product line and in various sizes, it is a classy fit for managerial or meeting areas and VIP lounges; also living spaces like homes and cafes.

- Geometric metal legs introduce depth by letting light through and casts intriguing shadows from every angle.
- Minimal error tolerance in production.
- A wide range of combinations.

Brooklyn Meeting Desks
