XXL

Design by **Nurus D Lab**

XXL

Meetings are about making decisions. Meeting halls and conference rooms are high priority areas that reflect the character of an establishment. XXL, as the name suggests, is designed to provide functional use of large meeting spaces and to accommodate for bigger meetings. Bearing the nature and splendor of wood in its elegant appearance, XXL is featured in 7 different size options -from 3.4 to 9 meters- to choose from.

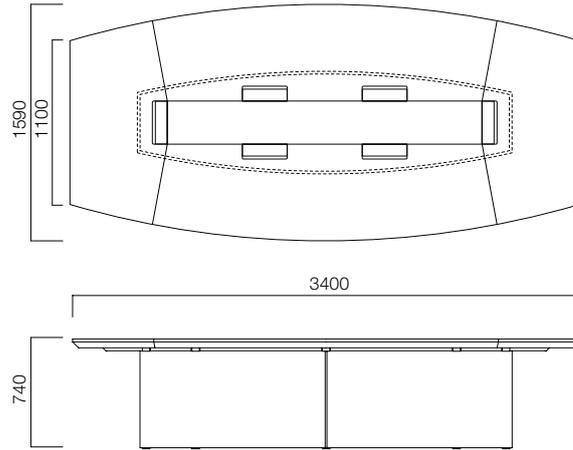

XXL is easily distinguishable for its endurance as well as its connectivity solutions. True to today's needs, electrical and data connections are carried all the way up to the table top through the closed frame base. Outlets are secured and hidden by the lacquered, glass or eco-leather pads located in the center, accounting for an overall sharp and professional look.

Design by Nurus D Lab

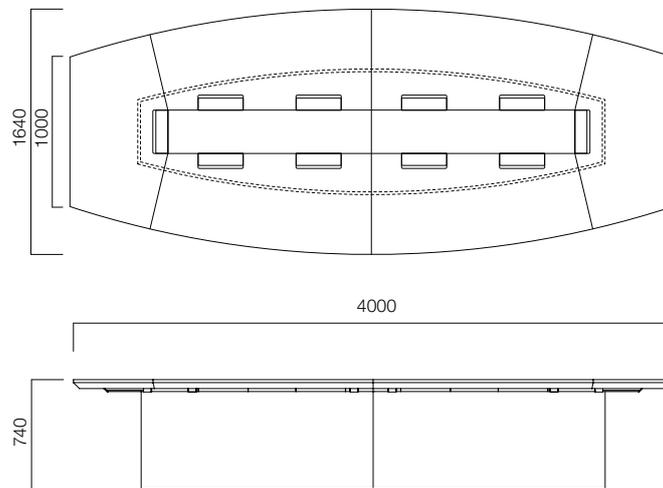

Always up-to-date with science and technology, Nurus D Lab designs products that are ahead of their time. Through human-centered observation, prototyping and in respect to trending needs and dreams, the team works diligently. Coming up with meaningful and reflective design solutions only marks the start of the process: From strategy to launch and support, D Lab manages it all. Each detail is attended and tested through at the advanced level.
