Cushions Collection

Design by **Nurus D Lab**

**For you and your loved ones;
colourful, comfortable, and healthy.**

Cushions collection adds dynamism and liveliness to living spaces with a variety of colour options and graphic pattern choices. Our cushions are produced in accordance with health and safety standards, helping reflect your style in any environment.

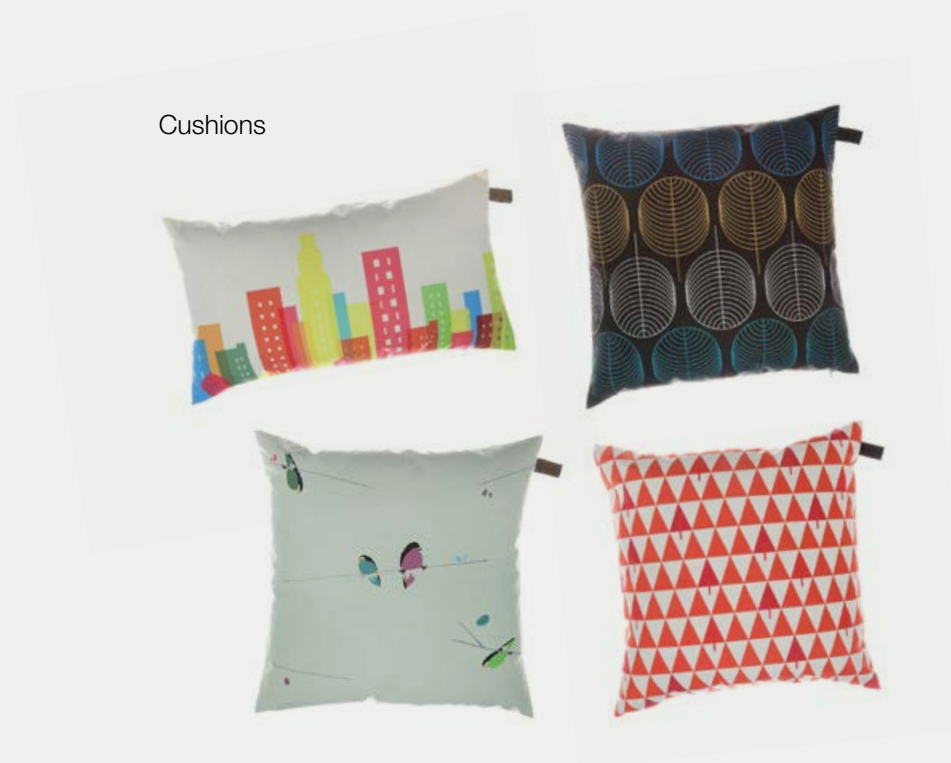

Produced with a special focus on human health and safety, our cushions feature colour options and graphic pattern choices to reflect your style.

Our cushions feature anti-allergic and fire-proof fabric, protecting your health while bringing colour and liveliness to living spaces. Produced from recyclable fabric and easy to take off and clean with a secret zipper, cushion cases provide an aesthetic look with a rich variety of colour and pattern choices.

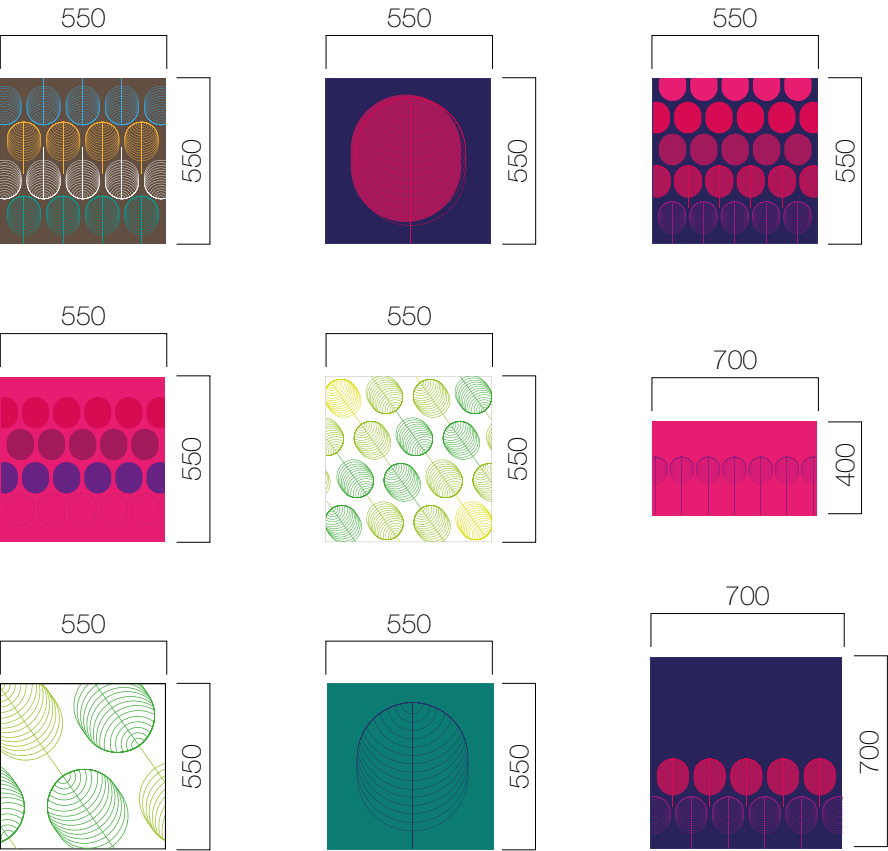

Fibre filling used in cushions prevent them from losing volume and shape, while goose feathers on the outer layer add comfort to your living space.

You can safely use our cushions; they are produced by using environment friendly ink, and do not include any hazardous chemicals.
