GOOD DESIGN

GERMAN DESIGN AWARD NOMINEE 2016

Quiet, concentrated, and versatile working.

Ever-changing working habits of modern business life require work environment to be redefined. We need spaces where we can conduct teamwork, individual efforts, brainstorming, minute-meetings and a variety of interactions, as well as spaces to concentrate and make best use of our break times.

Rich product family of Isola collection was carefully designed with meticulously calculated measurements; technological hardware equipped on Isola will meet all requirements of a work environment. Creating spaces within spaces, Isola features Media Wall that includes **Nurus Links®** connection point that not only facilitates access to electrical connections, data transfer, and multimedia sharing, but also enables tele-conferences, video conferences, presentations, and training sessions to be conducted.

Isola is an integrated new generation workstation featuring meeting module, phone booth, and Media Wall. Isola creates spaces within spaces with a wide product range, meeting all requirements in work environments.

Isola work systems establish focused and quiet work spaces with 4 different types of products: Angled panel, Flat panel, T panel, and Honeycomb panel. Angled and Flat panels can be utilized for creating printer sections, waiting rooms, or individual work spaces; both units feature table slab and seating unit choices. In addition, 144 cm and 164 cm tall Flat panels offer hanger bar option.

Isola meeting module includes **Nurus Links®** connection point, facilitating data transfer and multimedia sharing, as well as enabling conducting presentations, training sessions, minute meetings, teamwork, and video conferences.

Isola phone booth helps make personal calls without having to leave work space or losing time.

Featuring a **Nurus Links®** connection point to connect all your mobile devices including laptops and notebooks, Media Wall enables you to conduct presentations, trainings, and meetings anywhere you like.

During design phase, Isola panel heights were carefully calculated to minimize environmental impact while working, conducting interviews, or just thinking. Sound isolation supports concentration, while electrification solutions promote a more efficient way of working. Versatile structure and functionality of Isola seamlessly adapts into new dynamic work culture.
