Atlas

Design by **Dominique David**

Atlas

Innovative design of Atlas introduces orderly living spaces in an aesthetic look. Atlas has single and triple choices, both of which offer two versions: regular, or mounted on a platform to rotate 360° degrees.

Atlas provides practicality and versatility while dividing wide spaces such as open offices, waiting rooms and social areas into separate sections.

Design by Dominique David

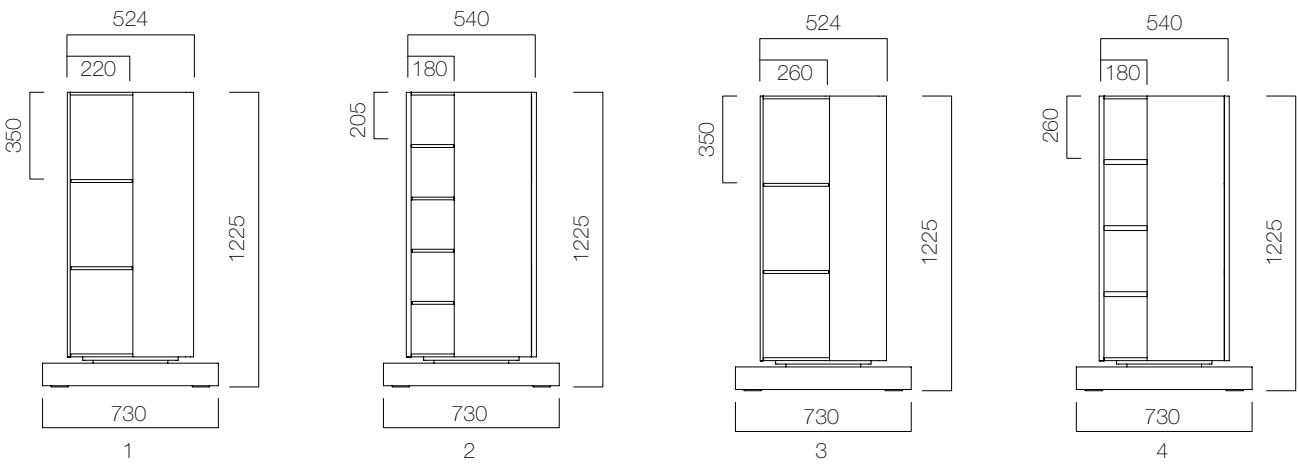

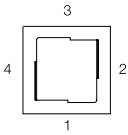

Dominique David redefines habits, space effectiveness, time saving, and more fun with multifunctional furniture designs. You can distinguish a common design language in his designs for Habitat, Conran Shop, Doma Viva, Hughes Chevallier, and Roche Bobois.

He offers answers to your feelings, interior space demands and personal needs with his signature designs. He summarizes his products as lively, open to communication and ready to adapt.

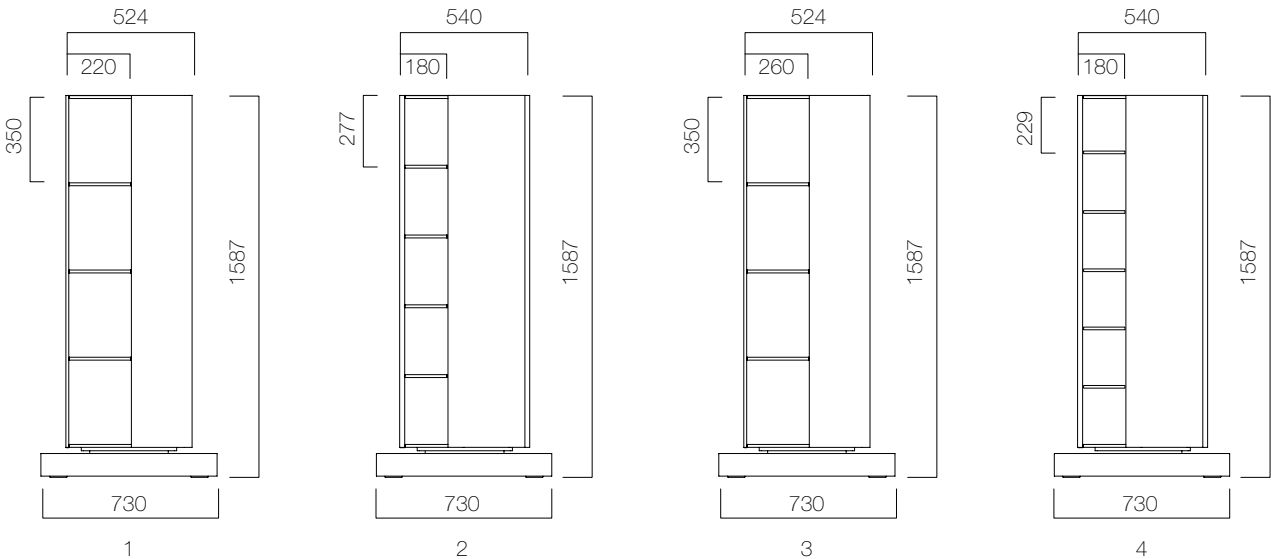

Practical and versatile...
